

銘傳大學八十八學年度二年制在職進修專班招生考試

第二節

英文閱讀寫作 試題

Instruction : Please read the following passage and based on the information provided, write a short essay (100-150 words) on your position and justify your comments. Please double-space and keep your handwriting clear.

The war between women and men has been waging on for centuries. Nowadays, since the women had earned their right to be educated and are able to function in this society as full members of the society, not of a subgroup, women are able to claim places of their own in the competitive world. Woman in order to prove their value in this world, have to put in extra mileage and effort to be evaluated on the same scale as men are.

However, this does not discourage women's determination to fight for their right to have equal opportunity in jobs, education and every other aspect. Some of the men feel threatened by women's ability and intelligence. Yet, they do not need to be. Women are not fighting to be treated above men. They are asking to have the freedom to choose whatever they want to be and not be restricted by their gender roles which should also be the utmost goal for the men to strive for as well. All human beings should have that freedom to choose their role and path of life without discrimination of gender, sex orientation, size, height, race, and any of those elements which have nothing to do with the quality and ability of the persons. What are your opinions and positions and the reasons for your belief on this issue?
